- Developed the back end of the IoT website application.
- Designed the hardware and PCB layouts for the microcontrollers, sensors, and actuators.

IoT-Based Indoor Disaster Monitoring System

Manila, Philippines

November 2022 - December 2022

- Designed and developed a user-friendly and responsive UI/UX of the IoT website application using Bootstrap and Canvas - Gauges.
- Developed the back end of the IoT website application.
- Designed the hardware and the PCB layout for the microcontroller and sensors.

LTO License Pre-Test Assessment Application

Manila, Philippines

April 2021 - May 2021

- Designed and developed the front end of the android mobile application.
- Developed the back end of the android mobile application.

ACHIEVEMENT

Best Project Presentation in Methods of Research

Project Leader

Manila, Philippines

May 2022

CERTIFICATE

Huawei Internet of Things Certification

Manila, Philippines

December 2022

EXTRACULLICULAR ACTIVITY

Automation, Robotics, and Mechatronics Society

Vice President

Manila, Philippines

November 2023 - Present

SKILLS

Programming: C++, Python, Java, Kotlin, HTML, CSS, JavaScript, and PHP

Technical/Programmatic: Website Development, IoT Development, Android Mobile Development, Database Management, API Implementation, and Git

Platforms: Windows, Linux
